

INDUSTRY NEWS

Turpin Sales is pleased to announce our partnership with mPower Products by Modern Industries!

Turpin Sales & Marketing is pleased to announce their partnership with mPower Products by Modern Industries! mPower provides innovative workholding products that power greater manufacturing productivity, set-up efficiencies and operating cost reductions. The advanced technology engineered into the mPower line of integrated workholding products offers numerous benefits.

- The power to make set-up and fixture changes in just seconds
- Unequaled workholding flexibility
- Optimized machining throughput
- Maximize your competitive edge by reducing operating costs

Quick Change Fixturing

- Precision - repeatability and accuracy within .0004" or better
- Self-Extracting - no binding or prying fixture and base plates apart
- Recessed/Flush Mount
- Retrofitable with competitive systems
- Ease of use compared to shoulder bolts and dowel pins.

Modular Tooling Columns

- Kit construction enables quick assembly
- Build your own columns - faster, more accurate and less expensive
- Open architecture easily accommodates hydraulic and electrical systems
- Serialized sets - uniquely manufactured to ensure best-fit accuracy
- Rigid lightweight high strength design reducing overall weight
- Strength and rigidity compared to cast tombstones

Indexers

- Simplicity - indexers are mechanically actuated by the machine tool, eliminating the need for electronic or hydraulic systems
- Low cost operation - indexers are significantly less costly to operate vs. a typical power-driven indexer
- Faster set-up & integration - can be integrated into fixturing systems much faster than powered systems
- Multiple actuation options - rotary and plunger activated models
