CONSISTENTLY GOOD SURFACES FOR SMALL COMPONENTS

Precision-pressed WP1 Wiper Geometry

- Ideal for swiss type machining applications.
- Twice the surface finish with the same feed rate.
- Same surface finish with double the feed rate.
- Higher productivity due to higher feed rates.
- Various insert type available: CC. . . , DC. . .

The strong advantages of a WIPER geometry combined with our latest grades make this insert one of the best of its kind.

Properties:

The leading geometry enables small infeeds.

The WIPER cutting edge offers consistently good surfaces.

The cutting edge ensures good cutting availability.
