

INDUSTRY NEWS

Money is made at the cutting edge!

Bilz ThermoGrip® Heat Shrink Machines are used to properly heat and cool the toolholders quickly, reducing the time needed to change cutting tools and ensuring the toolholders are not overheated.

Bilz offers heat shrink machines from entry level, low volume shrinking to high-end solutions for high performance manufacturing, the versatile product range of ThermoGrip machines provides the optimal solution for every application.

With its unique coil changing system, the power transfer adjusted to different clamping chucks is guaranteed within a short period of time. Compared to other systems, this makes it possible to clamp the smallest diameter tools safely and reliably allowing for a constant preparation of a high number of tools guaranteed.

Visit www.bilzusa.com for more information.

ISG1000	Entry level model. No cooling. For tools with a shank size up to 3/4"
ISG2200	Mid level model. Air cooled. For tools with a shank size up to 3/4"
ISG3430TLK	Mid level model. Table top, air cooled. For shank sizes up to 1-1/4"
ISG3430TLK4A	Top level model. Table top, air cooled. For shank sizes up to 1-1/4"
ISG3410TWK	Mid level model. Table top, water cooled. For shank size up to 1-1/4"
ISG3410WK	The "Ultimate" Shrinker. Water cooled. For tools with a shank size up to 2"
ISG4410WK2-HL	Large tool shrinker. Water cooled. For large and heavy shrink fit toolholders.
