NEW! Milling Swap Program

Our swap program enables customers to exchange their ineffective or old milling cutters for brand-new Palbit tools — *hassle-free on a one-time order.*

- 1 Here's the deal:**
We will swap out any competitor's milling cutter body for **FREE**, with the purchase of ten inserts per pocket. This can be done via a single order or a blanket order, with 3 monthly releases. For example, a 4-pocket cutter requires an order of 40 inserts to qualify.
- 2 How does it work?**
Place the Palbit tool order with a Pilot Precision Products Distributor, ship the other brand cutters to that Distributor and voila! Upon the Distributor's reception of both, they will ship a complete package with the new cutters and inserts ordered. If a blanket order is preferred, the release of inserts will be based on the POs referenced scheduling.
- 3 Why consider this offer?**
First and foremost, the Palbit milling cutters we selected for this offer (see chart below) are top-of-the-line, modern, and are efficiently designed using the latest carbide insert grades, geometries, and features (**100% manufactured in-house for over 100 years**). They have been proven to outperform competitors most of the time.
We understand the costs, risks, and headaches faced by customers when it comes to managing non-performing, used, or worn-out milling cutters effectively. That's why we have developed a convenient and cost-saving program that not only addresses these concerns but also promises to increase productivity while saving on direct costs.

Product Name

Call Pilot Precision Products at **413-350-5200** or your local distributor to place your order. You can also learn more about this program and send a RFQ by scanning the QR code.
