

## INDUSTRY NEWS

### **If you haven't tried out Pilot's Hassay MAX broaches, NOW is the time!**

MAX out your rotary broaching with 12X tool life compared to a T-15 and 91% decrease in overall cost per part!

The Hassay MAX Series rotary broaches offer many advantages over conventional coated and uncoated broaching tools including edge toughness for high production applications, better heat resistance and 2X to 10X longer tool life.

Manufactured from custom hardened alloys, these hexagonal, square and punch rotary broaches are a specially formulated material that combines high hardness with exceptional abrasion resistance and toughness. Ideal for sockets where long tool life is required and are intended for use on materials with tensile strength exceeding 190 KSI and up to 50 Hrc.

Also, check out their new website. The new site features brand and application-based directories of all their products with links to the interactive shoppable eCatalog scheduled to launch at the end of June.

Pilot is also launching a completely new Pilot catalog for 2022 at the end of June. The catalog includes new products across all brands as well as sales-ready sections for some of their most popular items. Print copies will be available in early July.
